### BRATTLEBORO GUEST DAY

Entertained Two Thousand Visitors  
On Tuesday.

Brattleboro, Aug. 25.—Brattle-  
boro's guest day today was a huge  
success. Over 2,200 guest tickets  
were issued to visitors to town from  
8:30 o'clock in the morning to two in  
the afternoon and some after that.  
These tickets, worn in sight, admitted  
the wearer to everything free except  
meals. The program for the day  
included three band concerts, two  
ball games, an exhibition drill by  
Co., I. V. N. G., boxing and wrestling  
matches, free trolley and motor  
boat rides, moving pictures in any of  
the theatres, speaking on the Com-  
mon by Secretary James P. Taylor  
of the Greater Vermont association  
and President F. H. Babbitt of the  
Bellows Falls Chamber of Commerce  
and the right to inspect any or all of  
the industrial plants in town. In ad-  
dition any guest might have his  
horse or horses stabled and fed free  
in any livery stable in town while  
automobiles were parked, if desired,  
under police protection.

Booths on the park at the foot of  
Main street hill and on the steps of  
the town hall were presided over by  
young women who issued guest tick-  
ets to all presenting themselves at  
the booths and giving their names  
and addresses. From the time of  
the arrival of the first trains in the  
morning until long after two o'clock  
in the afternoon these young women  
were busy all of the time, although  
the big rush was from 8:30 to 11:30  
a. m.

At one o'clock this afternoon a  
band concert was given on the Com-  
mon followed at two o'clock by  
speaking. Mr. Taylor said that this  
guest day is a unique contribution  
to the work of unifying Vermont in-  
terests and is another notable ex-  
ample of the justly famed Brattle-  
boro aggressiveness. It means in-  
creasing the hold of the State upon  
the younger people whom it is de-  
sired to keep at home at work and  
at play.

### FOR STRONGER NAVY

Secretary Daniels Spoke Before the  
House of Governors.

Boston, Mass., Aug. 25.—Govern-  
ors of the States, who have been  
holding their annual conference here  
at 5 o'clock this afternoon met in the  
quarter of Admiral Frank Fletcher  
on the superdreadnaught, Wyoming,  
flagship of the Atlantic fleet. For  
three hours they had been watching  
fleet evolutions and tactical man-  
oeuvres by ten battleships and six-  
teen torpedo destroyers. Many of  
them had never seen a battleship  
before and some even had not seen  
the ocean.

When they were gathered in the  
cabin, Secretary of the Navy Joseph  
Daniels told them that Governor  
Walsh of Massachusetts had asked  
him to lend a battleship for the con-  
ference, but that he had lent all the  
fleet that was in New England wa-  
ters. It was just leaving, he said,  
for a month's target practice off the  
Virginia Capes.

"You have not seen a review," the  
Secretary continued. "You have  
seen the fleet at work. The officers,  
the Secretary, the President even,  
cannot make a navy. The people  
make the navy. New York and Bos-  
ton and Philadelphia alone cannot  
make a navy the interior must help  
make the navy, too. If we are going  
to have one. I believe we should in-  
crease this navy steadily so that in  
a time of stress and emergency, the  
strong right arm of the nation will  
be able to defend the country against  
attack from any quarter.

"I know that when you gentlemen  
go to your homes you will speak the  
word that will determine how large  
our navy shall be, leaving to the ex-  
perts the determination of the type  
of the ships and the quality of munitions.  
Since the war began every  
officer in our navy has been turning  
to profit all that we have learned in  
this war, and the best things we are  
doing, like our inventions, are things  
we cannot talk about. Today your  
navy has no superior in the world.  
"But there are stronger navies. If  
we have twenty ships and an enemy  
has forty, the valor of our men and  
excellence of our ships will be of no  
avail. It is for us to continue to  
strengthen our navy, and that means  
that the interior must want it as  
well as the States along the coast."

### GERMAN SPY ARRESTED

Pictures of U. S. Military Reserva-  
tions Found in His Possession.  
Washington, Aug. 25.—Gustav  
Kopach, a young German employed  
as an instrument maker by the Car-  
negie Institution here, was arrested  
to-night by agents of the department  
of justice charged with violating the  
national law for the protection of the  
national defenses by making pic-  
tures of military reservations.  
He was held in \$5,000 bail for trial.  
According to the office Kopach had  
in his possession photographs of the  
fortifications and guns at Fortress  
Monroe and of the reservation at  
Cape Henry, Va., where the govern-  
ment is planning extensive works  
to defend the entrance to Chesape-  
ake bay.

When arrested the prisoner is said  
to have made no attempt to deny  
taking the pictures.

Your chance to get a \$25.00 suit for  
\$15.00, made by Hart Schaffner &  
Marx. A \$16.00 suit for \$7.50 at Mil-  
ligan & Roche's. Adv.6314

### MODEL STREET SIGNS.

New Type a Great Help to the Public  
of New York City.

The problem of providing street signs  
of the best possible type for Manhat-  
tan is one to which Borough President  
Marks has addressed himself.

He insisted upon finding if possible  
a type of sign that would enable peo-  
ple to determine definitely and at a  
glance the name of the street on which  
they might be and also the name of  
the cross street toward which they  
might be looking; that these signs  
should be legible at a considerable dis-  
tance and, furthermore, that they  
should be so placed in relation to  
street lights as to be readily visible at  
night as well as in the daytime.

As a result a type has been evolved  
which has met the exacting require-  
ments laid down by President Marks.  
The new signs, like the old, are placed  
on lampposts at street intersections on  
diagonally opposite corners. They con-  
sist of a steel plate twenty-two inches  
long and seven and a half inches high,  
laying at the center of the top a semi-  
circular projection eleven and one-  
eighth inches wide at the base, with a  
radius of five and one-eighth inches.  
On the main body of the sign plate is  
indicated the name of the avenue or  
street; on the semicircular projection at  
the top is indicated the name of the  
cross street. The lettering is white  
and four inches high on a dark blue  
background enameled on the plate.

The sign plate is held in a bronze  
colored skeleton steel holder, into  
which it is inserted from the top. The  
plates are reversible and can be seen  
from either side, while the holder is so  
designed as to afford a rectangular  
framing for the name of the avenue or  
street and an oval framing for the name  
of the cross street. The holder or  
frame is made as flat as possible, all  
unnecessary ornamentation being omit-  
ted, not only in order to enhance the  
dignity and good appearance of the  
sign, but also in order to prevent as far  
as possible the face of the sign from  
being darkened by shadows such as  
are cast by the projecting ornamenta-  
tion on signs of other types.

Now, for the first time in the his-  
tory of New York city, through the use  
of this new type of street sign, which  
gives double information on a single  
sign, it is possible, either by day or  
by night, for people traveling along a  
New York street, particularly those  
people riding in trolley cars or other  
fast moving vehicles, quickly and pos-  
sibly to determine from a consider-  
able distance exactly which street they  
are on and which cross street they are  
approaching.

### TO REBUILD RUINED TOWNS

Frank Koester Will Help to Replan  
Devastated European Municipalities.

Already projects are on foot to replan  
some of the destroyed Belgian towns  
as well as some of the towns on the  
Russian frontier. Frank Koester of  
New York is making arrangements  
with foreign city planning experts to  
co-operate in this work.

Mr. Koester has had a long foreign  
and American experience in city plan-  
ning. A German by birth, he has  
been one of the pioneers in America of

Photo by American Press Association.

FRANK KOESTER.

a comparatively new art which orig-  
inated in Europe and in which Ger-  
many has made great strides. He de-  
livered addresses at the congress for  
city planners at Dusseldorf in Ger-  
many in 1912 and at the international  
conference of city planning and city  
maintenance at Ghent, Belgium, in  
1913. He was awarded a gold medal  
at the world exhibition in Paris in 1905  
for architectural and engineering plans.  
He is the author of several works,  
among them "Modern City Planning  
and Maintenance," "Hydroelectric De-  
velopments and Engineering," "Elec-  
tricity For the Farm and Home" and  
"The Price of Inefficiency."

A rather interesting fact has been  
established by investigations made by  
plant pathologists in the employment  
of the department of agriculture—that  
the insects that are responsible for the  
leaf blight of sugar beets are the same  
that cause a disease in the leaves of  
nasturtiums.

Senator Kenyon of Iowa has intro-  
duced a bill in the United States sen-  
ate which has in view the restriction  
of the shipment and sale of adulterated  
linseed oil. Several states have  
laws safeguarding purchasers against  
this type of fraud, but there is as yet  
no federal law to prevent it.

## School Suits

Send the Boy to School this Fall  
in a new Suit. It will make his young  
heart glad.

We certainly have some splendid and unusual values  
in School Suits.

Strong, sturdy fabrics—tailored with double strength  
at every point where the strain comes. Suits built for  
duty.

Double Breasted Suits, Norfolk Suits,  
Blouse Suits, etc. Sizes 6 to 18 years.

Priced as low as the good quality will  
allow. We're never "up" in price.

\$2.50, \$3.50, \$4.00 up to \$8.50

Remember that "bargain" School Suits are generally  
an expensive proposition.

Price stands for little, however, until you see the  
quality attached.

## C. H. Cutting & Co.

North Adams

Since 1870

### BACK YARD GARDENS.

National Bureau of Education Ad-  
vocate the Making of Home Gardens.

If every back yard in every large  
city in the country could be made to  
produce fruit and garden vegetables  
for the home the cost of living would  
receive the most depressing shock of  
all its ruthless career.

For the national bureau of education  
the idea is not a dream. The bureau  
believes that schoolchildren, backed by  
competent teachers of gardening em-  
ployed by the public schools, can make  
the home garden an immensely im-  
portant factor in domestic economy.

"Experiments already made by the  
bureau of education," declares Com-  
missioner Claxton, "show that with  
proper direction an average child be-  
tween the ages of six and twenty can  
produce on an eighth of an acre from  
\$50 to \$100 worth of vegetables. A  
third of the children in the city schools  
might easily produce \$300,000,000  
worth a year."

An agent of the bureau has returned  
from a tour of the south, west and  
east. Out of thirty-two cities visited  
fourteen have adopted the home gar-  
den along lines suggested by the bu-  
reau of education. Nine others are  
planning home gardens under the di-  
rection of women's clubs and play-  
ground associations.

"God first planted a garden," says  
Bacon, "and indeed it is the purest of  
all human pleasures."

Japanese Godowns.  
Godown is a place of safe deposit,  
usually underground. Every great  
Japanese home has one, and in it the  
most valuable pictures and ornaments  
are kept to be brought forth on special  
occasions.

What He's Done.  
Bacon—Do you think the man who  
invented the Welsh rabbit was a pub-  
lic benefactor? Egbert—Well, he cer-  
tainly has been the cause of preventing  
a lot of people dying of old age.—Yon-  
kers Statesman.

A New Process.  
Taking his visitor to the incubator,  
the chicken raiser removed the lid. A  
brood of little black Spanish chicks had  
just emerged from the shell.

"How did you manage to raise an en-  
tire brood all black?" asked the visitor.  
"By heating the incubator with a  
dark lantern."—St. Louis Post-Dis-  
patch.
